Brand: **Polk**Condition: **Used**Cabinet Color: **Wood - Light**

Polk Audio SDA-CRS

Acronyms: Stereo Dimensional Array - Compact Reference System

Each has a Polk standard fluid-cooled tweeter, two polymer-coated mid-range speakers with rubber surrounds, and

a large bass reflex passive driver in the rear.

SDA stands for "Stereo Dimensional Array" An interconnect cable connecting the R and L speakers is utilized for cross-talk cancellation. An out-of-phase signal of the left channel is sent/emitted from the far right driver in the right speaker. In turn, an out-of-phase signal of the right channel is sent/emitted from the far left driver in the left speaker. These out of phase signals cancel any cross-talk you may hear. With the SDA technology, the left ear only hears what is coming out of the left speaker and the right ear hears only what is coming out of the right speaker giving you excellent stereo separation.

These are well-built mdf cabinets covered with real stained oak veneer. There are a few superficial scratches. One speaker has a ding in it (see pictures), but it camouflaged by the rich wood grain. The SDA cable has slight kink in one of the connector plugs, but it is still fully functional. The R-H speaker is missing the Polk Audio logo on the grill. The grills have a few small blemishes, but are in good shape (6/10 see photos).

Both speakers are in excellent working condition. They will be carefully packed and shipped in two separate boxes in order to minimize any shipping damage.

Features and Specifications:

- Speaker Enclosures (2): 32 lbs each, 21"(w) x 12"(d) x 14" (h).
- Thermal, Self-Resetting Tweeter Protection
- Rear facing Passive Radiator
- Left-Right Mirror-Imaged Cabinets
- Full Range

See my other auction for some great stands to compliment these speakers!

These speakers are full range speakers that are awesome with two channel music and provide excellent front effects for Home Theater. It's very hard to find speakers these days that have a 3 dimensional soundstage that these speakers provide. With the interconnect cable attached, the soundstage will expand from wall to wall with excellent depth. Without the interconnect cable, these speakers sound more like traditional non-SDA speakers. SDA is a patented technology from Polk. Check out the Polk forums and you will find that many people wish that Polk would continue to provide speakers with SDA technology. These speakers also provide excellent bass extension. In my opinion, it's very hard to find speakers that sound better than these for under \$1,000.

I'm the original owner, bought these in the mid 80's for about \$600 (on sale). Both speakers are in great shape. The interconnect cable is included. Setup recommendations are printed on the back of the speaker. I have always used proper amplification with the speakers and they have been well taken care of, I have never tripped the tweeter protection circuit.
