

Signature Reference Series: The Very Best of the Best

The legendary sound of Polk loudspeakers has for years been exemplified by its flagship Signature Reference Series (SRS), the speakers that carry Matthew Polk's signature.

Polk now introduces its SRS 1.2TL, 2.3TL, and 3.1TL, each featuring the latest breakthroughs in loudspeaker technology. Following is a technical brief of why the SRS speakers sound so remarkably like a live performance. After reading this information, it is hoped that you listen carefully to the SRS loudspeakers at your Polk Audio dealer. While you will probably hear things you have never heard from a stereo system, you can be assured that everything you hear is true.

It All Begins With the Sonic Excitement of Polk's Stereo Dimensional Array (SDA)

Years ago Polk Audio recognized the importance of more absolute separation of information reaching each ear. Of course, the fundamental

With conventional speaker systems, each ear hears both speakers, and the separation is minimized. The resulting soundstage is reduced to the small space between the speakers. A large symphony orchestra is reduced to only a few feet wide and a few inches deep.

Polk's "True Stereo" SDA technology delivers left signal information to your left ear and right signal information to your right ear. Each ear only hears its proper signal, thereby maintaining full stereo separation. The resulting soundstage is dramatic.

*Each Polk SDA incorporates a special extra set of drivers which radiate a difference signal that cancels the undesirable signal going from the wrong speaker to the wrong ear (interaural crosstalk distortion).
The result is True Stereo reproduction.*

...everything you hear is true.

concept of stereo reproduction is that there are two separate channels of information, each intended for one ear only (i.e. "true stereo").

To more accurately reproduce sound as it was originally created, it is vital that the integrity of this separation of information be maintained.

Experts have called the Polk SRS Series featuring the revolutionary Stereo Dimensional Array (SDA) technology "mindboggling...astounding...flabbergasting...a new dimension in sound." Others have discovered new life in their favorite musical selections. It is "True Stereo" by Polk.

Yes, Everything You Hear is True

Listen to what the critics say: "Mindboggling..astounding...flabbergasting." Listen to what other Polk owners say: "I've never heard anything like it...it's whole new world."

But no number of written accolades will prepare you for the experience of listening to the SRS loudspeakers at your Polk Audio dealer.

We invite you to your local Polk Audio dealer for a demonstration of this technology. Because everything you hear is true.

You will hear the next generation of loudspeakers.
